Advait Pandharpurkar

AI Engineer · LLMOps & Production GenAI Services

Pune, India · Open to relocation · +91 82759 93693 · advait.low@gmail.com · linkedin.com/in/lordofwizard · github.com/lordofwizard

SUMMARY

AI Engineer with 2+ years shipping production AI services and agentic systems in Python: an MCP AI service used across product teams, a Databricks-grounded multi-agent analytics service, and model-level token and cost observability across 5 engineering work categories. Sets the LLMOps standards around prompt management, automated evaluations in CI/CD, and multi-model cost, and takes full technical ownership from proof of concept to production.

TECHNICAL SKILLS

AI & LLMOps: RAG, AI Agents, Multi-Agent Systems, MCP, Prompt Engineering, Prompt Management, LangChain, LangGraph, Multi-Model Routing, LLM Gateway, Fallback Mechanisms, Observability, Cost Optimization, AI Evaluations, Model Fine-Tuning, Vector Stores
Data & Analytics: Databricks, MySQL, PySpark, Data Pipelines, PostgreSQL, Oracle DB, Apache Kafka
Cloud, Platform & CI/CD: CI/CD, AWS, Docker, Kubernetes, FastAPI, REST APIs, Microservices, Azure DevOps, Azure AI Foundry, Google Cloud, GitHub Copilot, GNU/Linux
Languages: Python, Rust, C++, Java, Bash, JavaScript

EXPERIENCE

Associate Software Platform Engineer II (AI Engineer) — MetLife, Corporate Technology Dec 2025 – Present

- Develop a 7-tool MCP AI service for Azure DevOps that surfaces pipeline status and change logs, detects failing pipelines, and proposes code fixes inside the IDE.
- Deploy a VS Code plugin that attributes GitHub Copilot tokens and cost to each prompt, engineer, team, and model across 5 engineering work categories, and is now requested as a corp-wide leadership demo.
- Build a multi-agent analytics service grounded in an Adobe Databricks business context, wiring a conversational frontend to natural-language analytics over 1 production dataset.
- Lead the migration of 1 vendor-built agent platform into the MetLife stack and build the internal MCP server platform product teams use, plus a local SonarQube MCP agent for code-quality checks.
- Mentor 1 junior AI engineer and trained the full MGCC CorpTech organization on prompt engineering, turning hands-on agent experience into 3 reusable enablement topics.

Software Developer Intern — Vanderlande Aug 2024 – Mar 2025

- Implemented Pact consumer/provider contract tests and Cucumber black-box suites for Kafka and REST microservices across 3 warehouse ITMs, validated on Oracle and PostgreSQL before merge.
- Replaced a dedicated industrial PC with a C++ and Rust PROFINET translation layer running on a VM, reaching 90% loop-sorter efficiency.
- Led a 12-person team to deliver a 3D warehouse simulation in Java (jMonkeyEngine), defining objectives, architecture, and the asset kit.

Software Developer Intern — RigBetel Labs Dec 2023 – Jul 2024

- Built RoboNet, a Rust and Python robot networking suite (hotspot daemon, logs web server, FastAPI config API) now running on every RigBetel Labs robot across 2 compute platforms.
- Benchmarked 4 video transports (WebRTC, TCP, UDP, Zenoh-DDS) on Google Cloud and shipped WebRTC middleware streaming NDI cameras at 720p/30 fps.
- Enabled internet teleoperation of ROS2 robots through 1 Google Cloud-hosted Zenoh router, replacing LAN-only control.

Freelance Robotics Consultant — Vector Robotics Feb 2025

- Delivered 1 on-device depth perception stack in Rust and OpenCV on NVIDIA Jetson, published through a ROS2 Jazzy package and demoed live at IIT Bombay E-Summit.

PROJECTS & AWARDS

- **MCServer** — Rust toolkit to host Minecraft servers free on Google Cloud; 100+ GitHub stars, 3k+ downloads, 400-developer Discord community.
- **Kavach National Hackathon** — 1st Runner-up, led a team building a USB-deployable RAM dump acquisition tool.
- **Smart India Hackathon** — Runner-up, led a team building a BTRFS/XFS recovery tool granted by NTRO.

EDUCATION

Bachelor of Engineering, Computer Engineering — Pune University 2025
