SUMMARY

AI Engineer with 2+ years building AI platforms and enabling other teams to self-serve on them: an internal MCP server platform used by product teams, a Databricks-grounded multi-agent analytics service, and model-level Copilot cost visibility across 5 work categories. Builds in Python on Azure with SQL across Oracle, PostgreSQL and Databricks.

TECHNICAL SKILLS

Languages: Python, SQL, Rust, C++, Bash, JavaScript
AI & ML: Azure AI Foundry, MCP, AI Agents, Multi-Agent Systems, LangChain, LangGraph, RAG, Prompt Engineering, Model Fine-Tuning, LLM Gateway, evaluations, monitoring, cost optimization
Data Platform & Engineering: Databricks, SQL, Spark, PySpark, Terraform, PostgreSQL, Oracle DB, Apache Kafka, MySQL, data validation, data architecture, data engineering
Cloud & DevOps: Azure, CI/CD, Docker, Kubernetes, Azure DevOps, Git, Google Cloud, AWS, Helm, Vault, Datadog, GNU/Linux

EXPERIENCE

Associate Software Platform Engineer II (AI Engineer) — MetLife, Corporate Technology Dec 2025 – Present

- Build the internal MCP server platform other product teams run their agents on, plus a 7-tool MCP AI service for Azure DevOps that surfaces pipeline status, change logs, and suggested code fixes.
- Build a multi-agent analytics service grounded in an Adobe Databricks business context, wiring a conversational frontend to natural-language analytics over 1 production dataset.
- Build a VS Code plugin that attributes GitHub Copilot tokens and cost to each prompt, engineer, team, and model across 5 engineering work categories, giving leadership model-level cost and usage visibility.
- Automate Oracle HCM pre-run versus post-run diff analysis with Comparator, saving an estimated 80 person-days and cutting quarterly comparisons from sprints to hours.
- Train the full MGCC CorpTech organization on prompt engineering across 3 enablement topics and mentor 1 junior AI engineer, turning hands-on agent experience into guidance other engineers self-serve from.

Software Developer Intern — Vanderlande Aug 2024 – Mar 2025

- Implemented Pact consumer/provider contract tests and Cucumber black-box suites for Kafka and REST microservices across 3 warehouse ITMs, validated on Oracle and PostgreSQL before every merge.
- Upgraded 3 platform BOMs from 2024.48.1 to 2025.2.0 across Spring Boot services, verifying local builds and black-box runs on Oracle and PostgreSQL and documenting release notes.
- Ran a performance analysis with the platform team and closed 4 WPLAT tickets spanning REST endpoints and Kafka event documentation (OpenAPI, AsyncAPI).

Software Developer Intern — RigBetel Labs Dec 2023 – Jul 2024

- Built RoboNet, a Rust and Python robot networking suite (hotspot daemon, logs web server, FastAPI config API) now running on every RigBetel Labs robot across 2 compute platforms.
- Benchmarked 4 video transports (WebRTC, TCP, UDP, Zenoh-DDS) on Google Cloud and shipped WebRTC middleware streaming NDI camera feeds at 1280x720/30 fps.

EDUCATION

Bachelor of Engineering, Computer Engineering — Pune University 2025
