Advait Pandharpurkar

Junior AI Engineer · Industrial AI, Python & MLOps

Pune, India · Open to relocation · +91 82759 93693 · advait.low@gmail.com · linkedin.com/in/lordofwizard · github.com/lordofwizard

SUMMARY

AI engineer with 2+ years building AI and data solutions in Python, with hands-on industrial production exposure: PROFINET control software on warehouse machinery and real-time sensor and telemetry work on robots. Ships LLM, API and MLOps tooling such as a 7-tool MCP AI service, and takes AI work from data analysis through to a working prototype.

TECHNICAL SKILLS

Languages & Data: Python, SQL, Rust, C++, Bash
AI & ML: LLMs, LLM APIs, MCP, AI Agents, Multi-Agent Systems, LangChain, LangGraph, RAG, Prompt Engineering, Model Fine-Tuning, MLOps, Databricks, model validation, experiment tracking, statistical analysis, time-series data, predictive modelling, anomaly detection, feature engineering
Industrial & Systems: industrial production systems, machine and sensor data, PROFINET, industrial controls, real-time systems, ROS2, OpenCV, NVIDIA Jetson, embedded C++
Platform & DevOps: Docker, Kubernetes, Git, CI/CD, Azure, Azure DevOps, Google Cloud, AWS, REST APIs, FastAPI, Microservices, GNU/Linux, monitoring

EXPERIENCE

Associate Software Platform Engineer II (AI Engineer) — MetLife, Corporate Technology Dec 2025 – Present

- Build a 7-tool MCP AI service for Azure DevOps (pipeline status, changelogs, suggested code fixes) plus the internal MCP server platform other product teams run their agents on.
- Automate Oracle HCM pre-run versus post-run diff analysis with Comparator, saving an estimated 80 person-days and cutting quarterly comparisons from sprints to hours.
- Take ambiguous requirements to working proofs of concept under real constraints, including a Reinsurance data-validation and reconciliation POC that secured funding for 2 AI engineering hires.
- Train the full MGCC CorpTech organization on prompt engineering across 3 enablement topics and mentor 1 junior AI engineer, documenting hands-on agent experience into reusable guidance.

Software Developer Intern — Vanderlande Aug 2024 – Mar 2025

- Removed the dedicated industrial PC from loop-sorter test emulation by writing a C++ and Rust PROFINET translation layer that runs on a VM, reaching 90% sorter efficiency against the real control pipeline.
- Implemented Pact consumer/provider contract tests and Cucumber black-box suites for Kafka and REST microservices across 3 warehouse ITMs, validated on Oracle and PostgreSQL before every merge.
- Ran a performance analysis with the platform team and closed 4 WPLAT tickets spanning REST endpoints and Kafka event documentation (OpenAPI, AsyncAPI).

Software Developer Intern — RigBetel Labs Dec 2023 – Jul 2024

- Wrote netpub, a ROS2 C++ publisher of live telemetry read over serial, reused across 3 robot platforms (Cepheus, Diadem, TTB-PRO-MAX).
- Built RoboNet, a Rust and Python robot networking suite (hotspot daemon, logs web server, FastAPI config API) now running on every RigBetel Labs robot across 2 compute platforms.

Freelance Robotics Consultant — Vector Robotics Feb 2025

- Delivered 1 on-device depth perception stack for OAK-D cameras in Rust and OpenCV, optimized to run on NVIDIA Jetson edge hardware and published through a ROS2 Jazzy package.

EDUCATION

Bachelor of Engineering, Computer Engineering — Pune University 2025
