# Advait Pandharpurkar

Software Engineer · Warehouse Systems & Java Backend

Pune, India · Open to relocation · +91 82759 93693 · advait.low@gmail.com · linkedin.com/in/lordofwizard · github.com/lordofwizard

## SUMMARY

Software Engineer with 2+ years building warehouse and backend systems in Java and Spring Boot: automation and test coverage for 3 warehouse ITMs on a platform moving totes and pallets through conveyor and loop-sorter flows, validated on Oracle and PostgreSQL at 90% loop-sorter efficiency. Owns concept-to-production delivery.

## TECHNICAL SKILLS

**Languages:** Java, Python, Rust, C++, Bash, JavaScript
**Backend & Messaging:** Spring Boot, REST APIs, Microservices, Apache Kafka, RabbitMQ, Maven, Gradle, Asynchronous Programming, OpenAPI, AsyncAPI, JWT
**Data:** PostgreSQL, Oracle DB, MySQL, Databricks, data validation
**Cloud & Platform:** Docker, Git, CI/CD, Kubernetes, AWS, Helm, Terraform, Vault, Datadog, Azure DevOps, Google Cloud, GNU/Linux
**Testing:** Pact contract testing, Cucumber, Gherkin, black-box testing, Mock Server, SonarQube

## EXPERIENCE

**Software Developer Intern — Vanderlande** Aug 2024 – Mar 2025

- Removed the dedicated industrial PC from loop-sorter test emulation by writing a C++ and Rust PROFINET translation layer that runs on a VM, reaching 90% sorter efficiency on conveyor flows.
- Implemented Pact consumer/provider contract tests for Kafka and REST microservices across 3 warehouse ITMs, catching interface breaks before merge.
- Designed Cucumber and Gherkin black-box exception scenarios for 3 ITMs with Mock Server, validating payloads and DTOs against Oracle and PostgreSQL in Docker.
- Delivered 4 WPLAT tickets across Java and Spring Boot REST endpoints, a quality review of Kafka event documentation (OpenAPI, AsyncAPI), and a performance analysis with the platform team.
- Upgraded 3 platform BOMs from 2024.48.1 to 2025.2.0 across Spring Boot services, verifying local builds and black-box runs on Oracle and PostgreSQL and documenting release notes.

**Associate Software Platform Engineer II (AI Engineer) — MetLife, Corporate Technology** Dec 2025 – Present

- Automate Oracle HCM pre-run versus post-run diff analysis with Comparator, saving an estimated 80 person-days and cutting quarterly comparisons from sprints to hours.
- Build a 7-tool MCP AI service for Azure DevOps (pipeline status, changelogs, suggested code fixes) plus the internal platform other product teams run their agents on.
- Mentor 1 junior AI engineer and trained the full MGCC CorpTech organization on prompt engineering across 3 enablement topics.

**Software Developer Intern — RigBetel Labs** Dec 2023 – Jul 2024

- Built RoboNet, a Rust and Python robot networking suite (hotspot daemon, logs web server, FastAPI config API) now running on every RigBetel Labs robot across 2 compute platforms.
- Benchmarked 4 video transports (WebRTC, TCP, UDP, Zenoh-DDS) on Google Cloud and shipped WebRTC middleware streaming NDI cameras at 720p/30 fps.

## EDUCATION

**Bachelor of Engineering, Computer Engineering** — Pune University 2025
