SUMMARY

Software engineer with 2+ years building AI agents, MCP developer tooling, and systems software across insurance, warehouse automation, and robotics. Ships in Python, Rust, C++ and Java; turns ambiguous business problems into working tools, from an 80 person-day automation win to a POC that secured 2 AI engineering hires.

TECHNICAL SKILLS

Languages: Python, Rust, C++, Java, Bash, JavaScript
AI: AI Agents, Multi-Agent Systems, MCP, LangChain, LangGraph, RAG, Prompt Engineering, Azure AI Foundry, GitHub Copilot
Backend & Infrastructure: FastAPI, REST APIs, Spring Boot, Apache Kafka, Microservices, Docker, Kubernetes, Azure DevOps, GNU/Linux
Data & Testing: PostgreSQL, Oracle DB, Databricks, Pact, Cucumber, SonarQube
Robotics & Real-time: ROS2, Zenoh, WebRTC, OpenCV, PROFINET, UDP/TCP

EXPERIENCE

Associate Software Platform Engineer II (AI Engineer) — MetLife, Corporate Technology Dec 2025 – Present

- Build a VS Code plugin giving leadership AI cost and usage visibility, attributing Copilot tokens and cost to each prompt, engineer, team, and model across 5 work categories; directors requested a broader leadership demo.
- Automate Oracle HCM pre-run vs post-run diff analysis with Comparator, saving an estimated 80 person-days and cutting quarterly comparisons from sprints to hours.
- Built a Reinsurance data-validation and reconciliation POC that secured funding for 2 AI engineering hires.
- Delivered a 7-tool MCP server for Azure DevOps (pipeline status, changelogs) that detects failing pipelines and suggests code fixes inside the IDE.
- Lead migration of all vendor-built METRO agents to GitHub Copilot and the MetLife stack; built a local SonarQube MCP agent and an internal MCP server platform.
- Trained the full MGCC CorpTech org on prompt engineering; mentor 1 junior AI engineer. GTO Nomination Award and GEM Award (MGCC level).

Software Developer Intern — Vanderlande Aug 2024 – Mar 2025

- Removed the dedicated industrial PC from loop-sorter test emulation by writing a C++/Rust PROFINET translation layer that runs on a VM, reaching 90% sorter efficiency.
- Implemented Pact contract tests and Cucumber black-box suites for Kafka/REST microservices across 3 warehouse ITMs, validated on Oracle and PostgreSQL.
- Led a 12-person team to build a 3D warehouse simulation game in Java (jMonkeyEngine) for the W-PLAT hackathon.

Software Developer Intern — RigBetel Labs Dec 2023 – Jul 2024

- Built RoboNet, a Rust/Python robot networking suite (hotspot daemon, logs web server, FastAPI config API) now running on every RigBetel Labs robot.
- Benchmarked 4 video transports (WebRTC, TCP, UDP, Zenoh-DDS) and shipped WebRTC middleware streaming NDI cameras at 720p/30 fps.
- Enabled internet teleoperation of ROS2 robots via a Google Cloud Zenoh router, replacing LAN-only control.

Freelance Robotics Consultant — Vector Robotics Feb 2025

- Built an OAK-D depth perception stack in Rust and OpenCV on NVIDIA Jetson, publishing via ROS2 Jazzy; demoed live at IIT Bombay E-Summit.

PROJECTS & AWARDS

- **MCServer** — Rust toolkit to host Minecraft servers free on Google Cloud; 100+ GitHub stars, 3k+ downloads, 400-developer Discord community.
- **Kavach National Hackathon** — 1st Runner-up, led a team building a USB-deployable RAM dump acquisition tool.
- **Smart India Hackathon** — Runner-up, led a team building a BTRFS/XFS recovery tool granted by NTRO.

EDUCATION

Bachelor of Engineering, Computer Engineering — Pune University 2025
