# Advait Pandharpurkar

AI Engineer · Copilots, Chatbots, Agents & LLM Integration

Pune, India · Open to relocation · +91 82759 93693 · advait.low@gmail.com · linkedin.com/in/lordofwizard · github.com/lordofwizard

## SUMMARY

AI engineer with 2+ years shipping LLM applications in Python: copilots, chatbots and agents integrated into existing enterprise systems, plus retrieval-grounded analytics over production data. Builds in short iterations from idea to working application - a 7-tool MCP AI service and internal agent platform used across product teams - and owns integration and prompting end to end.

## TECHNICAL SKILLS

**Languages:** Python, SQL, Rust, C++, Bash, JavaScript
**AI & LLM:** Azure AI Foundry (Azure OpenAI), LLMs, copilots, chatbots, AI Agents, Multi-Agent Systems, MCP, LangChain, LangGraph, Semantic Kernel, prompt engineering, context engineering, model fine-tuning, LLM gateway, cost optimization, RAG, embeddings, vector databases, chunking strategies
**Data & Integrations:** REST APIs, FastAPI, Microservices, Apache Kafka, SQL, PostgreSQL, Oracle DB, Databricks, data pipelines, data validation
**Cloud & Platform:** Azure, Google Cloud, AWS, Docker, Kubernetes, CI/CD, Git, OpenAPI, GNU/Linux, monitoring
**Quality & Delivery:** rapid prototyping, test automation, Pact contract testing, Cucumber, SonarQube, code review, technical documentation

## EXPERIENCE

**Associate Software Platform Engineer II (AI Engineer) — MetLife, Corporate Technology** Dec 2025 – Present

- Lead the migration of 1 vendor-built agent platform to GitHub Copilot and the MetLife stack, and build the internal MCP server platform other product teams run their agents on.
- Built a Microsoft Teams chatbot and AI agent that analysed meeting transcripts, generated summaries and action items, and sent results to leaders automatically after every meeting.
- Build a multi-agent analytics service grounded in an Adobe Databricks business context, wiring a conversational frontend to natural-language analytics over 1 production dataset.
- Take ambiguous requirements to working proofs of concept under real constraints, including a Reinsurance data-validation and reconciliation POC that secured funding for 2 AI engineering hires.
- Train the full MGCC CorpTech organization on prompt engineering across 3 enablement topics, turning hands-on agent experience into reusable guidance for other engineers.

**Software Developer Intern — Vanderlande** Aug 2024 – Mar 2025

- Implemented Pact consumer/provider contract tests and Cucumber black-box suites for Kafka and REST microservices across 3 warehouse ITMs, validated on Oracle and PostgreSQL before every merge.
- Removed the dedicated industrial PC from loop-sorter test emulation by writing a C++ and Rust PROFINET translation layer that runs on a VM, reaching 90% sorter efficiency against a live control pipeline.

**Software Developer Intern — RigBetel Labs** Dec 2023 – Jul 2024

- Built RoboNet, a Rust and Python robot networking suite (hotspot daemon, logs web server, FastAPI config API) now running on every RigBetel Labs robot across 2 compute platforms.
- Benchmarked 4 video transports (WebRTC, TCP, UDP, Zenoh-DDS) on Google Cloud before choosing, then shipped WebRTC middleware streaming NDI camera feeds at 1280x720/30 fps.

**Freelance Robotics Consultant — Vector Robotics** Feb 2025

- Delivered 1 on-device depth perception stack for OAK-D cameras in Rust and OpenCV, owned end to end for a robotics client and published through a ROS2 Jazzy package.

## EDUCATION

**Bachelor of Engineering, Computer Engineering** — Pune University 2025
