Advait Pandharpurkar

AI Engineer · Conversational AI, RAG & Production LLM Applications

Pune, India · Open to relocation · +91 82759 93693 · advait.low@gmail.com · linkedin.com/in/lordofwizard · github.com/lordofwizard

SUMMARY

AI engineer with 2+ years building and deploying LLM applications in Python on Azure: a conversational analytics service grounded in production data, a Teams chatbot turning meeting transcripts into action items, and a 7-tool MCP AI service plus the agent platform other teams use. Owns technical trade-offs end to end in a regulated financial-services environment.

TECHNICAL SKILLS

Languages: Python, SQL, Rust, C++, Bash, JavaScript
AI & Conversational: RAG, conversational AI, chatbots, LLM applications in production, AI Agents, Multi-Agent Systems, MCP, LangChain, LangGraph, prompt engineering, context engineering, evaluations, LLM gateway, cost optimization
Data & Retrieval: embeddings, vector stores, chunking strategies, Databricks, SQL, PostgreSQL, Oracle DB, Apache Kafka, data pipelines
Cloud & Platform: Azure, Azure AI Foundry, Azure DevOps, Docker, Kubernetes, CI/CD, Git, REST APIs, FastAPI, Microservices, Google Cloud, AWS, GNU/Linux, monitoring
Quality & Delivery: Pact contract testing, Cucumber, test automation, SonarQube, code review, technical documentation

EXPERIENCE

Associate Software Platform Engineer II (AI Engineer) — MetLife, Corporate Technology Dec 2025 – Present

- Built a Microsoft Teams chatbot and AI agent that analysed meeting transcripts, generated summaries and action items, and sent results to leaders automatically after every meeting.
- Build a multi-agent analytics service grounded in an Adobe Databricks business context, wiring a conversational frontend to natural-language analytics over 1 production dataset.
- Delivered APEX sessions on file analytics and a correction agent, and trained the full MGCC CorpTech organization on prompt engineering across 3 enablement topics.
- Build the internal MCP server platform other product teams run their agents on, plus a 7-tool MCP AI service for Azure DevOps (pipeline status, changelogs, suggested code fixes).
- Take ambiguous requirements to working proofs of concept under real constraints, including a Reinsurance data-validation and reconciliation POC that secured funding for 2 AI engineering hires.

Software Developer Intern — Vanderlande Aug 2024 – Mar 2025

- Implemented Pact consumer/provider contract tests and Cucumber black-box suites for Kafka and REST microservices across 3 warehouse ITMs, validated on Oracle and PostgreSQL before every merge.
- Upgraded 3 platform BOMs from 2024.48.1 to 2025.2.0 across Spring Boot services, verifying local builds and black-box runs on Oracle and PostgreSQL and documenting release notes.

Software Developer Intern — RigBetel Labs Dec 2023 – Jul 2024

- Built RoboNet, a Rust and Python robot networking suite (hotspot daemon, logs web server, FastAPI config API) now running on every RigBetel Labs robot across 2 compute platforms.
- Benchmarked 4 video transports (WebRTC, TCP, UDP, Zenoh-DDS) on Google Cloud before choosing, then shipped WebRTC middleware streaming NDI camera feeds at 1280x720/30 fps.

Freelance Robotics Consultant — Vector Robotics Feb 2025

- Delivered 1 on-device depth perception stack for OAK-D cameras in Rust and OpenCV, owned end to end for a robotics client and published through a ROS2 Jazzy package.

EDUCATION

Bachelor of Engineering, Computer Engineering — Pune University 2025
